Createspace, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Some of the novel concepts in this book: A new organizational structure for the CIA, interconnected senses, creative robots, free energy, intellectual universities, innovative film stories, novel business ideas, thousands of new design ideas, and several other revolutionary inventions and innovations. Every era of human history has met a unique revolution made by various scholars of education, science, politics, literature, and economics. That revolution may be a literary work, a kind of invention, a political thought, or a new religion, making some new waves among the human race to be civilized, aware, educated, spiritual, artistic, creative, and intellectual. Those revolutions, novelties, and inventions were from various persons with diverse approaches, not from a single approach. But, in the history of invention and innovation, I confidently declare with my 25 years of research on creativity and innovation that this book will create new revolutionary sciences, technologies, arts, businesses, and other concepts with a single powerful inventive approach of invention and creative science which can emerge from merging relativity and structural science. Through this book, learn the ultimate secrets of creativity with a number of new revolutionary inventions and get known millions of dollars worth of international contests.
