The book's only purpose is to provide interested readers can read on the analysis of the contents of a book. The executive summary of modern analytical foundation (2) the theory of stochastic dynamical system is an important new direction of research in the field of power systems. Describes several typical stochastic processes and their corresponding stochastic integral definition and nature of the foundation of Modern Analysis (2nd edition) system. Stochastic integral similarities and differences. the system creates a Gaussian process. fractional Brownian motion. Levy process and gradient noise driven stochastic ordinary differential equations. stochastic partial differential equations solution generated random dynamical systems (including multi-valued stochastic dynamical systems). given the random attractor. measure attractor. random inertial manifold approximate random inertial flow shaped concept and existence proof. Modern analytical foundation (2nd edition) is a comprehensive analysis of the textbook. the book is divided into five chapters: general topology. linear functional analysis. sobolev space. linear operators. spectral analysis and nonlinear Analysis Profile. which each chapter are separate chapters for each other and association. The modern analytical foundation (2) the main audience for the high school students graduate in mathematics. also...
