Watson's win on Jeopardy came as no surprise to those who had read Deus ex Machina sapiens. It was written largely during the 1990s, around the time that another IBM supercomputer--Deep Blue--was trouncing world chess grandmaster Garry Kasparov. The book has since been updated on a few points of detail but its primary message remains intact: the Machine is rapidly evolving as Man's rival if not replacement for the job of Steward of the Earth. Building upon the work of some of the world's greatest scientists, philosophers, and religious thinkers, and drawing particularly from developments in the computing and cognitive sciences--particularly, the field of artificial intelligence, or AI--the book reveals the evolutionary emergence of a machine that is not just intelligent but also self-conscious, emotional, and free-willed. In the 1980s and 90s you used to hear grandiose claims about AI. Machines would soon surpass humans in intelligence, it was claimed by some. The Japanese government spent a billion dollars on one project to make it happen. Well, it didn't happen, but that didn't stop the development...
