Journal of Physical Chemistry Volume 12

By American Chemical Society

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 208 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: . . . has in fact been often observed, but was generally attributed to the migration or change of volume of the chloroplasts--a supposition that seems to me highly improbable when applied to the palisade-parenchyma especially when the rays of light do not fall strictly in the direction of the cell axes. I really think that at any rate the greater part of this bleaching may be accounted for by supposing some of the chlorophyllin to be reduced to protophyllin. To sum up, we may thus admit the existence not only of two, as in the blood, but even of three states of oxidation of the green coloring matter. These transformations may be considered a starting point for a theory of chlorophyll as a chemical sensitizer. Having enumerated the chief arguments in favor of the admission that chlorophyll may be considered a sensitizer in both acceptances of...
