## ENVIRONMENTAL CLEANUP: BETTER DATA NEEDED FOR RADIOACTIVELY CONTAMINATED DEFENSE SITES: NSIAD-94-168

[DOWNLOAD](#)

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 22 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO reviewed the accuracy and adequacy of Department of Defense (DOD) data on military sites contaminated with low-level radioactive waste, focusing on data sharing among DOD and other agencies. GAO found that: (1) DOD identification of radiologically contaminated sites depends on data that are often outdated, inaccurate, and incomplete; (2) data on contaminated sites are incorrect because some sites have been double-counted while others have not been identified; (3) some Defense Logistics Agency (DLA) sites and former DOD sites have not been included in the data; (4) the DOD database includes general categories of contaminants at sites, such as low-level radiation, but it cannot identify specific contaminants or quantities; and (5) more specific information would better help identify the types of contamination that exist, the types of required cleanup, and potential risks associated with continued contamination and cleanup efforts. This item ships from La Vergne, TN. Paperback.
