

## Cosmology on Trial: Cracking the Cosmic Code

Filesize: 9.08 MB

### **Reviews**

*Thorough information! Its such a good study. Sure, it is perform, still an amazing and interesting literature. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
(Evie Emmerich)

## COSMOLOGY ON TRIAL: CRACKING THE COSMIC CODE

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 246 pages. Dimensions: 9.0in. x 6.0in. x 0.6in. What if you knew the anomalies that cosmologists don't discuss in public? *Cosmology on Trial* a remarkable study of unexplained and unsolved mysteries of the universe. New discoveries challenge the Big Bang model, General Relativity, Quantum Mechanics, String Theory, Gravity, Black Holes, and Redshift interpretation. Bestselling author, Pierre St. Clair, examines the latest theories like an attorney in a court of law. The author speaks without complex jargon. Just the facts, please. Show me the evidence. Scientific journals cite major disagreements with current models of the universe. The discovery of a ring of nine cataclysmic gamma ray bursts (GRBs) five billion light years across was published in *Monthly Notices of the Royal Astronomical Society*: On August 4, 2015, Professor Lajos Balazs announced at a press conference, This structure contradicts the current models of the universe. Investigating teams of physicists are trying to verify if known processes of galaxy formation created the ring structure. If not, present theories of the evolution of the universe will need a radical revision. The May 2014 issue of *Scientific American* highlighted another serious calamity. The negative results are beginning to produce if not a full-blown crisis in particle physics, then at least a widespread panic. Theorists working in particle physics admit they're in a state of confusion. Science periodicals, forums, and papers suggest fundamental principles of physics need revising. Theoretical physics is at a crossroads right now! In a sense we've entered a very deep crisis. Dr. Neil Turok, Director of the Perimeter Institute for Theoretical Physics. We find yet another major problem in the Standard Model of physics. Gravity, dark matter, dark energy, and consciousness comprise over 96% of the universe yet they are completely absent...
