Current. 1 Cloth(s), 2014. hard. Book Condition: New. Charles Darwin's theory of natural selection explains how useful adaptations are preserved over time, but the biggest mystery about evolution eluded him. Natural selection can preserve innovations, but it cannot create them, notes evolutionary biologist Andreas Wagner. Or as Hugo de Vries put it, "natural selection may explain the survival of the fittest, but it cannot explain the arrival of the fittest." Here Wagner presents the missing piece in Darwin's theory, explaining how adaptations are not just driven by chance, but by a set of laws that allow nature to discover new molecules and mechanisms in a fraction of the time that random variation would take. "If there is one subject even more controversial than the evolution of intelligence, it is the intelligence of evolution. Andreas Wagner presents a compelling, authoritative, and up-to-date case for bottom-up intelligence in biological evolution, and it sticks." George Dyson "A book of startling congruencies, insightful flashes and an artful enthusiasm that delivers knowledge from the inorganic page to our organic brains." Kirkus Reviews (starred review) 291.
