

Economic and Social Survey of Asia and the Pacific 2006: Energizing the Global Economy

By United Nations

Academic Foundation, 2006. Softcover. Book Condition: New. The growth rate of the global economy slowed to 3.2 per cent in 2005 down from the 4.0 growth rate in 2004; the growth rate of ESCAP developing countries also decelerated moderately in 2005, primarily as a result of high oil prices and a softening of growth in global trade. Prospects for 2006 are for growth in the region to maintain its current momentum and for price pressures to abate slightly, provided oil prices do not increase significantly and global external imbalances do not unwind suddenly. Prospects for the ESCAP region also would be affected if avian influenza develops into a human pandemic. Efforts are needed both at the regional and national levels to ensure that the benefits of high growth in the region are passed on to the poor by creating opportunities for decent employment for all. It is only then that the problems of the working poor, jobless growth and youth unemployment, which are haunting the region, will be addressed properly. CONTENTS IN DETAIL : Foreword Executive summary I. Global and regional economic developments and prospects: implications for the ESCAP region Overview The international environment Trade Capital flows Oil prices: a...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Ally Reichel

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
