THE INTEGRATION PROCESS IN LATIN AMERICA (PAPERBACK)

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Regional cooperation and integration has had its autonomous development in the Latin American area, characterized by a common sense of sentiment of historical, political, cultural and certain legal aspects. In this sense, the various Latin American associative forms are traditionally understood as phases of an evolution, certainly not linear, of a wider and more general sub-continental integration movement that is rooted in so called Bolivian internationalist theory or Bolivian international law and founding in attempts to reunite or associate, on the basis of the compartmental history, young republics of new independence since the mid-1800s. In this sense, the Latin American integrationist veto has deep roots like the European one, though at the end of a cycle of development and evolution of integration processes, the integrationist association in Latin America has produced a pluralism of organizations that have ended up Not to affect, or at least fragmentally affect, the economic-political integration of the area. In recent times, even in view of the limited and fragmentary effects produced by the various forms of cooperation and integration represented by ALADI, SELA, Mercosur and the Andean Community, the desire for sub-continental integration is found in the Brasilia Treaty of 2008, Of the UNASUR. This treatise, almost contemporary with the evolution of European integration carried out with the Lisbon Treaty, resumes the integrationist spirit of Bolivian theory in an attempt to synthesize the previous, plural and fragmented forms of integration and cooperation which, more or less Success, as the case may be, characterized the evolution of Latin American integrationism.
