Springer-Verlag Berlin and Heidelberg GmbH & Co. K. Paperback. Condition: New. 173 pages. Dimensions: 9.2in. x 6.1in. x 0.5in. This volume contains the accepted papers presented during the International Conference on Research and Education in Robotics EUROBOT Conference 2009, held in La Fert e-Bernard, France, May 21-23, 2009. Today, robots are indispensable tools for flexible, automated manufacturing in many areas of industry as well as for the execution of sophisticated or dangerous tasks in the nuclear industry, in medicine and in space technology, and last but not least, they are being increasingly used in everyday life. To further encourage research in this area, the EUROBOT Conferences have been set up. They aim to gather researchers and developers from academic fields and industries worldwide to explore the state of the art. This conference is accompanied by the EUROBOT Contest Finals, an international amateur robotics contest open to teams of young people. During the finals in 2009, teams from 25 countries came together not only to compete, but also to exchange knowledge and ideas and to learn from each other. In addition to the paper and poster presentations, there were two invited talks: Raja Chatila, Director of the LAAS CNRS, Toulouse, France whose talk was about Cognitive Robots Vronique Raoul, EUROBOT Association, France whose talk was about EUROBOT Organizing a conference is a task that requires the collaboration of many people. We personally would like to warmly thank all members of the EUROBOT Conference 2009 program committee; without their help and dedication it would not have been possible to produce these proceedings. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
