Shabda Press, United States, 2015. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The rise of militant atheism has brought to fore some fundamental issues in our conventional understanding of religion. However, because it offers science as an alternative to religion, militant atheism also exposes to scrutiny the fundamental problems of incompleteness in current science. The book traces the problem of incompleteness in current science to the problem of universals that began in Greek philosophy and despite many attempts to reduce ideas to matter, the problem remains unsolved. The book shows how the problem of meaning appears over and over in all of modern science, rendering all current fields-physics, mathematics, computing, and biology included-incomplete. The book also presents a solution to this problem describing why nature is not just material objects that we can perceive, but also a hierarchy of abstract ideas that can only be conceived. These hierarchically deeper ideas necessitate deeper forms of perception, even to complete material knowledge. The book uses this background to critique the foundations of atheism and shows why many of its current ideas-reductionism, materialism, determinism, evolutionism, and relativism-are simply false. It presents a radical understanding of religion, borrowing from Vedic philosophy, in which God is the most primordial idea from which all other ideas are produced through refinement. The key ideological shift necessary for this view of religion is the notion that material objects, too, are ideas. However, that shift does not depend on religion, since its implications can be known scientifically. The conflict between religion and science, in this view, is based on a flawed understanding of how reason and experiment are used to acquire knowledge. The book describes how reason and experiment can be used in two ways-discovery and verification-and while...
