

Contribution to the Study of a Mathematical Model of Erythropoiesis

Filesize: 6.29 MB

Reviews

This kind of publication is every thing and got me to searching in advance and much more. It really is simplistic but surprises within the 50 percent from the ebook. I am easily could get a satisfaction of studying a composed publication.
(Orval Halvorson III)

CONTRIBUTION TO THE STUDY OF A MATHEMATICAL MODEL OF ERYTHROPOIESIS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The asymptotic stability of a nonlinear system of three differential equations with delay is analyzed, describing the dynamics of red blood cell production. This process is based on the differentiation of stem cells, throughout divisions, into mature blood cells, that in turn control the dynamics of immature cells. Taking into account an explicit role of the mature cell population on the cell proliferation, a characteristic equation with delay dependent coefficients is studied. A necessary and sufficient condition for stability of the zero fixed point is determined. Finally, the existence of a Hopf bifurcation for the only positive fixed point is obtained, leading to the existence of periodic solutions. | Format: Paperback | Language/Sprache: english | 72 pp.
