

## Inhalant

By Frederic P. Miller

Alphascript Publishing Dez 2009, 2009. Taschenbuch. Condition: Neu. Neuware - Inhalants are a broad range of drugs in the forms of gases, aerosols, or solvents that are breathed in and absorbed through the lungs. While some inhalant drugs are used for medical purposes, as in the case of nitrous oxide, this article focuses on the non-medical use of inhalants, as recreational drugs that are used for their intoxicating effect. Most inhalant drugs that are used non-medically are ingredients in household or industrial chemical products that are not intended to be concentrated and inhaled, including organic solvents, fuels and propellant gases such as freon and compressed hydrofluorocarbons that are used in aerosol cans such as hairspray, whipped cream and non-stick cooking spray. A small number of recreational inhalant drugs are pharmaceutical products that are used illicitly, such as anaesthetics and volatile anti angina drugs. Inhalant users tend to be people who do not have access to other drugs or alcohol, such as children, teenagers, incarcerated or institutionalized people, and marginalized individuals. The most serious inhalant abuse occurs among children and teens who 'live on the streets completely without family ties. 96 pp. English.
