Excerpt from Walsh-Suzzallo Arithmetics, Vol. 3: Business and Industrial Practice The distribution of topics through the various grades has been greatly influenced by the fact that many children leave school before they have mastered the fundamental processes in arithmetic. It has come to be recognized that essentials should be taught as soon as possible. The most important arithmetical facts and skills should come first and the least significant last. By applying these two principles to the organization of these books, it has been easy to achieve that much-desired end, the completion of the fundamentals of arithmetic in six school years.
