

Compressed air Volume 5

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 104 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 edition. Excerpt: . . . required being that which will empty one tank and fill the other. 3. By an electrically controlled mechanism, the circuit being controlled either by floats in the putnp tanks or by a pressure gauge on the intake pipe. Advantages. 1. The expansive energy in the compressed air is fully utilized. 2. There are no moving or delicate parts outside the compressor room except the check valves on water pipes. 3. One compressor can pump water from any number of sources. 4. In mine drainage the tanks may be submerged to any depth. From Pneumatic Eng. Co. , N. Y. In Figs. 2. 3 and 4 we have diagrams and data supplied me by the Pneumatic Engineering Co. . which will be interesting to those who care to investigate this extremely interesting and economical method of pumping by compressed air. Fig. 5 gives a problem of mimning under 90 pounds pressure which shows in detail the range of the work on the air compressor piston during the progress of changing the air from one water chamber to the other. It will be noted that the net work is even less than the full pressure work at 90 pounds pressure, thus showing that the compression work is practically eliminated, and 90 pounds pressure can be transferred from one receiver to the other at less than one-third of the power required to fill a receiver at 90 pounds pressure, consequently this system should be at least twice...
