Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from *The Control of Tomato Leaf-Spot* The use of Bordeaux or other copper-spray mixtures has given the most effective control of leaf-spot in the past, but the profits from spraying are variable and not always sufficient to justify the expense. A more effective and economical method of control lies in the use of modified field practices. The effects of tomato leaf-spot epidemics can be largely avoided by setting out large, stocky, well-hardened plants early in the spring. As the leaf-spot fungus has a high minimum sporulation temperature, viz, 59 F., and therefore seldom infects tomato plants in the field in the Middle Atlantic and Middle Western States, the region where it is severe, before June 15 to 30, these early plants escape more leaf-spot than the small plants commonly set late. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.](#)
