ICT WORLD: DEVELOPMENT, FAILURE OF COMPUTER SMARTPHONE TECHNOLOGIES (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. ICT (Information Communication Technology) world is rapidly developing and new technologies are introduced every day. Some conspiracies, technological and security related issues are also happening in this world. But the development of computer and smart phone technologies are very effectively going on as the modern world people are taking this development positively. In this book, we tried to show the gradual development of computer and smartphone technologies. For that reason, we followed segmentation strategy to focus different types of computer and smartphone related technologies in the different segments. Cloud Computing, Big data, discussion of different types of smartphones OS are included in the book. We not only showed the development of the ICT world but failures and conspiracies related to the modern day technologies are also presented in this book. Success and failure of outsourcing, internet and social networking security issues, failures and lacking of internet connectivity etc. issues are very effectively presented with real life examples. The goal of this book is to provide correct information about the gradual development and some major failures of ICT world. As various types of computer and smartphone related technologies are discussed in this book, thus we have been presented all of these in article or summery writing format. Because it s hard for anyone to write about all the technologies thoroughly in a small paperback type book. The strategy helped us to effectively write every issues in a short format and the reader of the book will also enjoy the writings as all the writings are short article or summery based and easy to read.
