## Bulletin from the Laboratories of Natural History of the State University of Iowa, Vol. 6: May 13, 1911 (Classic Reprint)

By Samuel Calvin

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Bulletin From the Laboratories of Natural History of the State University of Iowa, Vol. 6: May 13, 1911 The new material examined in connection with the preparation of this paper has been collected from various localities in the Vancouver Island Region. In the summer of 1903 I spent some time at the Minnesota Seaside Station at Port Renfrew on the West Coast of Vancouver Island at the entrance of the Strait of Juan de Fuca. There was no provision made for dredging, consequently all the specimens obtained were shore forms. In 1908 and again in 1909 I spent some time at the Dominion Biological Station at Departure Bay, five miles from the City of Nanaimo on the East Coast of the Island. Here I collected shore specimens and obtained others by dredging, seldom in water more than 25 fathoms deep. The best locality for dredging was in Northumberland Strait, between Gabriola Island and other smaller Islands, at the mouth of Dodd's Narrows, a narrow channel between two small islands, about ten miles southeast of...

### Reviews

*I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- Dana Hintz

*Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You wont really feel monotony at at any moment of your time (that's what catalogues are for concerning when you ask me).*

-- Elisa Reinger
