# HOMOLOGY OF LOCALLY SEMIALGEBRAIC SPACES

Springer. Paperback. Condition: New. 138 pages. Dimensions: 9.2in. x 6.1in. x 0.3in. Locally semialgebraic spaces serve as an appropriate framework for studying the topological properties of varieties and semialgebraic sets over a real closed field. This book contributes to the fundamental theory of semialgebraic topology and falls into two main parts. The first deals with sheaves and their cohomology on spaces which locally look like a constructible subset of a real spectrum. Topics like families of support, homotopy, acyclic sheaves, base-change theorems...
