Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The learning society is not a new idea, although its popularity has grown in recent years with the suggestion that lifelong learning is a condition for economic competitiveness in a global economy, replacing the earlier conception of it as a condition for democratic citizenship. This reader, designed to accompany Module E827 of the MA in Education, critically examines the demographic, technological, economic and cultural challenges which have led to interest in the idea of a learning society, and explores their policy and practical implications for lifelong learning. It also explores and evaluates trends in education and training which support the development of a learning society. Overall, the book provides readers with a range of opinions on the learning society within which broad context they can place their own practice.
