American Psychiatric Association Publishing, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book. The only current book on the topic, Telepsychiatry and Health Technologies: A Guide for Mental Health Professionals is a practical, comprehensive, and evidence-based guide to patient-centered clinical care delivered in whole or in part by technological devices and applications. Not a technology-centered health informatics book, but rather one that describes basic technological concerns and emphasizes clinical issues and workflows, it is designed for psychiatrists, psychologists, and other mental health clinicians who seek to learn the modes, models, and methods of telepsychiatry. More than 30 practitioners of telepsychiatry across the core mental health disciplines were involved in development of the text, contributing knowledge and clinical examples. Rich with case studies and hands-on guidance, the book introduces strategies, then clearly illustrates how to put them into practice. The editors believe that psychiatry increasingly will focus on the treatment of populations, and that technology offers the best hope of doing so efficiently and effectively. Careful thought went into the book's conception and design, resulting in a marriage of structure and content that meets the needs of today's clinicians: The editors employed a unique process of manuscript development, first outlining each chapter in its entirety, then assigning sections to contributors selected for their specific clinical experience and therapeutic expertise. The result is a text that flows logically and creates synergy across chapters without duplication. The book provides how-to guidance on setting up a new telepsychiatry practice or integrating technologies into a current practice, covering critically important topics such as data collection, security, and electronic health records. Technologies addressed include telephony, smartphones, apps, e-mail, secure texting, and videoconferencing, all of which are increasingly being used in the assessment and treatment of patients with psychiatric disorders....
