Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from **Experiments on the Physiology of Alcohol, Made Under the Auspices of the Committee of Fifty** Some may contend that the alcohol problem does not depend upon the science of physiology for its solution; but rather upon the moral, religious, or political functions of society. It should be remembered, however, that physiology is a broad science, whose ultimate aim is no less than to discover the laws and conditions under which may be developed the highest possible type of man. By the intimate correlations between body and mind, and under the recent outgrowths of the mother science into modern psychology and neurology, physiology would cover the whole man, body, mind, and soul. And it would have not only a healthy soul and a sound mind in a sound body, but the most perfect soul, mind, and body which can be developed under physical conditions. Thus problems touching human welfare, even questions of ethics and social science, must ever draw important factors for their solutions from this science which is fundamental to the conditions and processes of life itself. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
