IUTAM SYMPOSIUM ON ADVANCES IN MATHEMATICAL MODELLING OF ATMOSPHERE AND OCEAN DYNAMICS: PROCEEDINGS OF THE IUTAM SYMPOSIUM HELD IN LIMERICK, IRELAND, 2-7 JULY 2000 (PAPERBACK)

DOWNLOAD PDF

Springer, Netherlands, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The goals of the Symposium were to highlight advances in modelling of atmosphere and ocean dynamics, to provide a forum where atmosphere and ocean scientists could present their latest research results and learn of progress and promising ideas in these allied disciplines; to facilitate interaction between theory and applications in atmosphere/ocean dynamics. These goals were seen to be especially important in view of current efforts to model climate requiring models which include interaction between atmosphere, ocean and land influences. Participants were delighted with the diversity of the scientific programme; the opportunity to meet fellow scientists from the other discipline (either atmosphere or ocean) with whom they do not normally interact through their own discipline; the opportunity to meet scientists from many countries other than their own; the opportunity to hear significant presentations (50 minutes) from the keynote speakers on a range of relevant topics. Certainly the goal of creating a forum for exchange between atmosphere and ocean scientists who need to input to create realistic models for climate prediction was achieved by the Symposium and this goal will hopefully be further advanced by the publication of these Proceedings. Softcover reprint of the original 1st ed. 2001.
