

## Proceedings of the International Symposium: Nuclear Physics and Gamma-Ray Sources for Nuclear Security and Nonproliferation

Filesize: 3.24 MB

### **Reviews**

*The publication is not difficult in go through better to comprehend. I could comprehended everything using this created e publication. Its been designed in an exceptionally easy way in fact it is merely soon after i finished reading through this ebook by which basically transformed me, modify the way i really believe.*

World Scientific Publishing Co Pte Ltd. Hardback. Condition: new. BRAND NEW, Proceedings of the International Symposium: Nuclear Physics and Gamma-Ray Sources for Nuclear Security and Nonproliferation, Nuclear nonproliferation is a critical global issue. A key technological challenge to ensuring nuclear nonproliferation and security is the detection of long-lived radioisotopes and fissionable nuclides in a non-destructive manner. This technological challenge requires new methods for detecting relevant nuclides and the development of new quantum-beam sources. For example, one new method that has been proposed and studied is nuclear resonance fluorescence with energy-tunable, monochromatic gamma-rays generated by Compton scattering of laser photons with electrons. The development of new methods requires the help of researchers from a wide range of fields, such as nuclear physics, accelerator physics, laser physics, etc. Furthermore, any new method must be compatible with the requirements of administrators and nuclear-material inspectors.
