## TWO-PHOTON POLYMERIZATION AND APPLICATION TO SURFACE PLASMON POLARITONS

Cuvillier Verlag Aug 2008, 2008. Taschenbuch. Condition: Neu. Neuware - Plasmonics is a large part of the field of nanophotonics. Besides a wide range of industrial applications already developed, e.g. enhanced biosensors and diodes, surface plasmon polaritons (SPPs) are still an expanding field of research. In conventional optics, working on the sub-wavelength scale is not trivial, and structures smaller than half the wavelength will not lead to results expected by traditional optics. State-of-the-art microchips and optical data storage devices are...

## Reviews

It is an incredible ebook that we actually have ever study. This is certainly for all those who statte that there had not been a worthy of looking at. I am just pleased to inform you that this is the very best publication i have got go through during my individual daily life and can be he best ebook for possibly.

-- Clarabelle Marvin

This created publication is excellent. it had been writtern extremely perfectly and helpful. You will like the way the writer compose this ebook.

-- Brenden Sauer

Absolutely one of the best pdf We have ever read. I really could comprehended every little thing using this written e book. I am easily could get a satisfaction of reading a written publication.

-- Dr. Odie Hamill
