Springer-Verlag Gmbh Dez 2015, 2015. Buch. Condition: Neu. Neuware - This book reviews the current state of the art in managing infrastructure, urban regions, industrial regions and inhabited areas with respect to flooding and water damage. The author is a well-known expert in storm water management, and this book gives a broad overview of the different manageable components that play a role in storm water risks. It includes chapters on planning infrastructure and regional development, modifications in urban regions and localities with buildings and historical buildings, covering different city types and residential areas, housing and commercial zones, as well as housing development. The author then goes on to review different hydrological conditions that make areas safer, or more prone to storm water threats, and capture and store storm water. The last part of the books covers sealed infrastructure and their role in storm water hazards, including roads, public spaces, roofs, and others. 212 pp. Englisch.
