

Research road map approaching thin films of TCO and TE semiconductors

By Yaohua Zhu

LAP Lambert Academic Publishing Mai 2018, 2018. Taschenbuch. Condition: Neu. Neuware - Following the electropulsing induced phase transformations of alloys, systematic studies of thin films of Zn-Al alloys and semiconductors (Bi-Te, AZO-2 and AZO-5) were studied by using electropulsing. The detected multi-circulation of both phase transformations and preferred crystal orientation changes make it possible to monitor microstructural changes and to enhance physical and optical properties of the thin films. The research road map went through various aspects of the physical metallurgy, included thermal metallurgy, mechanical metallurgy, electro-metallurgy and electro-mechanical metallurgy, was scientifically logical and effective in studying and exploring application of the thin films of semiconductors. 68 pp. Englisch.

Reviews

Thorough manual for ebook fans. it had been writtern quite properly and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Dr. Catherine Wehner**

Absolutely among the best book I have possibly go through. I have go through and that i am certain that i am going to gonna read through once again again in the future. I am just delighted to tell you that this is basically the finest book i have got go through within my personal existence and could be he finest book for ever.
