

US Half-Track Vehicles in Action.

By Doyle, David.

Squadron Signal Publications, 2017. Condition: New. 80 pages, 220 photos. United States manufacturers produced more than 40,000 halftracks from 1933 until 1944. These mostly-armored vehicles moved artillery and infantry on rough terrain, snow and sand during World War II and Korea. Based on an adaptation of the White Scout Car, the US half-track vehicles of WWII combined the cross-country ability of a fully-tracked vehicle with the road performance of a medium truck. Variations of these vehicles included prime movers, armored personnel carriers, mortar carriers and a wide range of heavily armed variants. Vehicles produced by Autocar, Diamond T and White were used by U.S. forces, while similar International Harvester-built vehicles were supplied to our Allies through Lend-Lease. Both the Army and Marines took them into battle. They left their mark in Africa, Europe, Pacific islands and Korea. When the U.S. entered Vietnam, French halftracks were already in country. Before retirement, the Israeli Army listed about 600 halftracks in March 2008. Argentina donated its final 24 M9s to Bolivia in 2006. Some may still be operational. Brand new 11 x 8 paperback. SS12058 down \$1 2/18 sale.

Reviews

An exceptional pdf and also the typeface applied was intriguing to read through. It is definitely simplified but excitement in the 50 % in the ebook. I discovered this ebook from my dad and i recommended this pdf to find out.

-- Jarod Ward

Complete information for publication enthusiasts. It is really basic but shocks inside the fifty percent of your book. I am just delighted to let you know that this is basically the finest book i have read through in my individual lifestyle and might be he best pdf for actually.
