Starting with the Mortgage crisis in the USA in 2007 and the collapse of Lehman Brothers in September 2008, this problem increased to the worst global economic crisis ever. The negative effects of the Global Financial Crisis from 2007-2009 are both financial and real. The financial impact of the crisis resulted in problems in the banking systems of many countries. The real impact was that the economic growth has slowed down. The crisis brought many challenges and questions concerning the ability of the industries in the national economies to survive, the destiny of the employees and the role of the government in current market situation. However, the crisis might create opportunities for some industries if the companies don't let themselves to be misled by the general negative moods towards the current state of the market. The following essay gives an overview of the Global Financial Crisis and its challenges and monetary reactions. 16 pp. Englisch.
