

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times. Volume 35

Filesize: 1.28 MB

Reviews

A fresh e book with an all new viewpoint. It is really simplistic but unexpected situations in the 50 % from the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Dawn Hane)

MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES. VOLUME 35

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 Excerpt: .m degres et -degres? Of this Question thi re is a solution in the Annales for August, 1861, where the probability is found to be $\cos m - \cos n$; but it is remarked that Laplace trouve $(\cos m - \cos n : 90)$, ce qui semble inexact. 4753. (By Prof. Cropton, F.R.S.)--If 1, 2, 3, 4 are four concyclic points on a Cassinian oval whose foci are F, F', show that a bicircular oval can be drawn with 1, 2, 3, 4 as foci to pass through F, F'. Show also that the tangents at F, F' are double tangents; each touching the bicircular oval in a second point, and each passing through the centre of the circle 1234. Solution by Prof. Nash, M.A.; Prof. Scheffer, M.A.; and others. The equation of a Cassinian is $(x^2 + y^2 + c^2)^2 - 4c^2xy = m^4$ (1), the foci of which are $x = c, y = 0$. Let the equation of the circle through 1, 2, 3, 4 be $x^2 + y^2 = 2ax + 2by + c^2$ (2), o, \$ being the coordinates of the centre O. Substituting for $x^2 + y^2$ in (1), the equation of a conic through 1, 2, 3, 4 is $(2ax + 2by + c^2 + cy - icW - m^4)$ (3). The asymptotes of this conic are parallel to the lines $(ax + By)^2 - A^2 = 0$, and therefore perpendicular to the lines OF, OF', i.e., $(x - ayy - (y - W - i)$. Hence OF, OF' are double tangents to a bicircular quartic, having (2) for a circle...
