Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from An Investigation of the Losses in Power Transmission and an Estimate of the Installation and Maintenance of an Electrically Driven Plant at the Janesville Machine Company The Janesville Machine Company, located at Janesville, Wisconsin, manufactures agricultural implements, as plows, seeders, mowers, cultivators, harrows, listers, etc. They have been running for many years and have grown from a small concern to the present large proportions. As the business grew, building after building was added and, from an examination of the plant, one comes quickly to the conclusion that these buildings were erected without much consideration for economy in power transmission. There are many long shafts, one 112 feet long, running under the blacksmith shop, while another, 235 feet long drives the machinery in the warehouse machine shop. The long shaft mentioned first is driven by bevel gears, probably fifteen years old and quite badly worn. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition.
