

Chiral Triazole Fungicides Separation

By Hermawan, Dadan / Wan Ibrahim, Wan Aini

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | By Micellar Electrokinetic Chromatography | In recent years, capillary electrophoresis (CE) has been developed as a separation analysis method suitable for routine applications. Its popularity may be attributed to its extremely high efficiency, short analysis time and wide application range. Micellar electrokinetic chromatography (MEKC) has become popular as a powerful technique to solve many chemical analysis problems not only of neutral analytes but charged ones by using capillary electrophoresis (CE) instrument without any alteration. The environmental impact due to the heavy application of agrochemicals to open fields must be reduced. As for the chiral agrochemicals, the use of only biologically active enantiopure isomers should also help to reduce the total amount of chemical released into the environment. Triazole fungicide is one of the most important categories of fungicides. It has excellent protective, curative and eradicator power against a wide-spectrum of crop diseases. Chirality is expected to play a crucial role in bioactivities of triazole fungicides. The purpose of this study is to investigate the applications of micellar electrokinetic chromatography (MEKC) in chiral triazole fungicides analysis. | Format: Paperback | Language/Sprache: english | 140 pp.

Reviews

This kind of pdf is every thing and made me seeking ahead plus more. It is probably the most amazing ebook i have study. I am quickly can get a enjoyment of reading a composed pdf.

-- Florence Rutherford DDS

Definitely among the best ebook I actually have possibly read through. It is really simplified but unexpected situations in the 50 % from the publication. You wont truly feel monotony at at any time of the time (that's what catalogues are for concerning in the event you ask me).

-- Jerald Champlin II
