*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.*

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from International Clinics, 1906, Vol. 3: A Quarterly of Illustrated Clinical Lectures and Especially Prepared Original Articles on Treatment, Medicine, Surgery, Neurology, Pediatrics, Obstetrics, Gynecology, Orthopedics, Pathology, Dermatology No matter how mild the attack of pleurisy, rigid hygienic treatment must be insisted on from the beginning. The patient should go to bed and remain there until the fever has entirely disappeared and the exudate shows signs of receding. The sick-room should be well ventilated but free from drafts, and the atmosphere kept at an even temperature of from 65 to 68 F. The food should be nutritious and easily digestible, but preferably dry, especially after the development of the effusion. The first indication for special treatment is usually to relieve the pain in the side. Morphin hypodermically is useful, but its effect, even in large doses, is temporary. A far more reliable remedy is the application of a few wet cups or leeches. This measure, the value of which is well recognized but too often forgotten, affords immediate and permanent relief in the vast majority of cases without the aid of opium. Dry cupping is not nearly so effective. After the local bleeding thin poultices may be applied to the chest if necessary I have not been very favorably impressed with the heavy, unwieldy cataplasms of fuller's earth and glycerine which lately have been so much vaunted for their supposed depleting effects, and cannot regard them as a satisfactory substitute for the time-honored poultices of flaxseed meal. Some practitioners prefer ice-bags to poultices, but in my experience cold applications have not often been tolerated in simple pleurisy. Strapping the affected side from mid spine to mid-sternum...
