## Catalogue of the Chinese Imperial Maritime Customs Collection, at the United States International Exhibition, Philadelphia, 1876 (Classic Reprint) (Paperback)

By Robert Hart

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Catalogue of the Chinese Imperial Maritime Customs Collection, at the United States International Exhibition, Philadelphia, 1876 Coal, anthracite and bituminous, is found in great quantities all over the North of China. The extent of these coal-fields is estimated at some square miles, but the mining appliances are very defective and the coal hitherto extracted is but surface coal. As soon as the appearance of the strata indicates the presence of coal, or more often when it is seen cropping out of the hill-side, the miners commence tunnelling. They follow up the seam, working generally in a horizontal direction, slightly inclining upwards, to admit of the free egress of water. Hunan coal is largely used by the river steamers running between Hankow and Shanghai, and that mined at the northern end of the Island of Formosa is also utilised to a considerable extent both by foreign steamers and the gunboats built at the Government arsenal at Foochow. During the past year the authorities in Formosa have engaged the services of a foreign engineer and authorised the use, under his supervision, of European mining...
