APPLIED INTERNATIONAL TRADE ANALYSIS

The University of Michigan Press. Paperback. Book Condition: new. BRAND NEW, Applied International Trade Analysis, Harry P. Bowen, Abraham Hollander, Jean-Marie Viaene, This rigorous and comprehensive text encompasses modern theoretical and applied methods of analysis in the field of international trade. Rather than presenting the theory as fact, the authors illustrate the application of theory and consider those areas where theory appears deficient to explain observed phenomena. The analysis begins with perfect competition, followed by an examination of imperfectly competitive market structures (including a wide range of models of price and quantity competition) and of multinational production. Part 1 provides an overview of the patterns and policy of the trading world; part 2 explores the trade and trade policy of competitive markets; part 3 discusses the trade and trade policy of imperfectly competitive markets. Of special interest are the final two chapters in part 4, which provide an updated analysis of topics that are not typically covered in other texts, namely the properties of exchange rate regimes for international trade and the relationship between growth and international trade. The appendix provides a wealth of sources of data, most of which are available on the Internet. Another useful feature are the selected references and list of additional readings, ordered in terms of main topics, which appear at the end of each chapter. The book is designed to be adopted as the core text for advanced undergraduate or graduate courses in international trade; prerequisites are courses in intermediate microeconomics and introductory econometrics. Harry P. Bowen is Associate Professor (Adjunct) of Economics, University of California at Irvine. Abraham Hollander is Associate Professor of Economics, University of Montreal, and Associate Researcher at the Centre de Recherche et de Developpement en Economique. Jean-Marie Viaene is Professor of Economics, Erasmus University, Rotterdam, and Research Fellow at the Tinbergen Institute. This title...
