

Model Abstraction in Dynamical Systems: Application to Mobile Robot Control

Filesize: 7.41 MB

Reviews

It is great and fantastic. Better than never, though i am quite late in start reading this one. Your life period will likely be transform once you comprehensive reading this book.

(Blanca Davis)

MODEL ABSTRACTION IN DYNAMICAL SYSTEMS: APPLICATION TO MOBILE ROBOT CONTROL

To get **Model Abstraction in Dynamical Systems: Application to Mobile Robot Control** eBook, make sure you click the hyperlink listed below and save the document or get access to other information which might be relevant to MODEL ABSTRACTION IN DYNAMICAL SYSTEMS: APPLICATION TO MOBILE ROBOT CONTROL ebook.

Springer-Verlag Gmbh Sep 2008, 2008. Taschenbuch. Book Condition: Neu. 237x156x11 mm. Neuware - The subject of this book is model abstraction of dynamical systems. The primary goal of the work embodied in this book is to design a controller for the mobile robotic car using abstraction. Abstraction provides a means to represent the dynamics of a system using a simpler model while retaining important characteristics of the original system. A second goal of this work is to study the propagation of uncertain initial conditions in the framework of abstraction. The summation of this work is presented in this book. It includes the following: - An overview of the history and current research in mobile robotic control design. - A mathematical review that provides the tools used in this research area. - The development of the robotic car model and both controllers used in the new control design. - A review of abstraction and an extension of these ideas into new system relationship characterizations called traceability and -traceability. - A framework for designing controllers based on abstraction. - An open-loop control design with simulation results. - An investigation of system abstraction with uncertain initial conditions. 118 pp. Englisch.
