Packt Publishing - ebooks Account. Paperback. Condition: New. 124 pages. Dimensions: 9.2in. x 7.5in. x 0.3in. Create powerful WPF applications using Telerik controls with the help of real-world examples Overview Display database information in the Telerik WPF controls Get useful tips on creating engaging, interactive user experiences for Windows desktop applications Build powerful, responsive, and scalable line-of-business and enterprise applications using Telerik WPF controls In Detail Telerik Reporting is a lightweight reporting solution for all .NET cloud, web, and desktop platforms (Azure, Silverlight, WPF, ASP.NET, and Windows Forms) which targets developers and end users alike. Rich interactive and reusable reports can be created by developers in Visual Studio and by end users in the desktop-based Report Designer. This book will guide you through working with specific Telerik WPF controls as well as working with the database and other methods to load the controls. It will focus on four key technologies: the DataContext property of WPF, Telerik RadControls for WPF, XML serialization, and application security. Starting with the basics, Telerik WPF Controls Tutorial will take you from the simple usage of a DataTable to serializing XML files into objects, covering a discussion of different types of security and validation for WPF windows along the way. This book will start out by showing you the simple methods of populating Telerik RadControls using a DataTable. You will then move on to look at populating a generic list of objects from a database as well as serializing XML files into class objects. You will cover how to secure a WPF application using a simple database example as well as Active Directory to determine navigation control loading. You will then review using the Telerik API interface classes to load Gantt information. With this book, you will be guided through building an application with the...
