## ADVANCES IN INFORMATION TECHNOLOGY

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | Third International Conference, IAIT 2009, Bangkok, Thailand, December 1-5, 2009, Proceedings | At the School of Information Technology, KMUTT, we believe that information technology is the most important driver of economy and social development. IT can enable better productivity, as well as helping us to save resources. IT is giving rise to a new round of industrial and business revolution. We now can have products and services that once were believed to be beyond reach. Without IT, it is impossible for people to realize their full potential. Businesses worldwide are harnessing the power of broadband communication, which will have a profound and constructive impact on the economic, social development, education, and almost all aspects of our life. This new era of unified communication presents us with new challenges. This is why we should work together more closely to enhance the exchange of knowledge related to effective application of broadband communication and IT. It is my sincere hope that all contributions to the Third International Conference on Advances in Information Technology (IAIT 2009) will increase our understanding of how we can effectively apply this emerging technology for the benefit of all people all around the world. I hope IAIT 2009 will also lead to more research that can contribute to a better methodology for IT applications in the era of unified communication. I am very grateful to all our keynote speakers for coming all the way to Thailand. | Performance Analysis of BitTorrent and Its Impact on Real-Time Video Applications.- TOF Depth Camera Based 3D Gesture Interaction System.- Mining Top-K Periodic-Frequent Pattern from Transactional Databases without Support Threshold.- Intercropping Planning Models for an Agricultural Expert System.- An Impact of Scheduling Strategy to Parallel FI-Growth Data Mining Algorithm.- Bringing...
