THE ORIGIN OF LIFE: BEING AN ACCOUNT OF EXPERIMENTS WITH CERTAIN SUPERHEATED SALINE SOLUTIONS IN HERMETICALLY SEALED VESSELS (CLASSIC REPRINT)

Forgotten Books. Paperback. Condition: New. 156 pages. Dimensions: 8.7in. x 6.0in. x 0.6in. In this volume a memoir is reproduced on The Origin of Life Question that was submitted early in October, 1810, to the Royal Society, and which, as I was informed after an interval of a few weeks, was not considered suitable for acceptance by the Society. I desire, therefore, to make a few observations in the first place in reference to the subject of the paper; and, secondly, in regard to the action of the Society, and the probable causes that have led to such action. Concerning the main question—that of the Origin of Life on this Earth—men of science, or at least a majority of them, no longer appeal to the intervention of any non-natural or miraculous cause. As believers in the Doctrine of Evolution

Table of Contents I Introduction 25; II Concerning Experiments Made in 1806 34; III New Experiments Initiated in 1809 38; IV The Varying Effects of High Temperatures upon the Solutions 47; V Concerning the Experimental Conditions, the Nature of the Organisms Found in the Tubes, their Cultivation, and their Thermal Death-Point 53; VI Further Experiments Made in 1810 66; VII Additional Experiments Made with Pure Colloidal Silica Prepared by Grahams Method 78; VIII Thermal Death-Point of Such Organisms as have been found in the tubes 86; IX Tub Results of the Experiments now Recorded must be Considered to Prove the De Novo Origin of Living Matter 89; X The Forms Assumed by New-Rorn Units of; Living Matter 100; XI The Solutions Employed are not Prone to; be Contaminated by Air-Borne Particles 108; XII Does Silicon, either Wholly or in Part, Enter in the Place of Carbon into the Composition of the Protoplasm of the Organisms Found in the Tubes III About the Publisher Forgotten Books...
