TRANSACTIONS OF THE AMERICAN ELECTROCHEMICAL SOCIETY VOLUME 1**DOWNLOAD**

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Original publisher: Maxwell Air Force Base, Ala. : Center for Strategy and Technology, Air War College, Air University, 1998 OCLC Number: (OCoLC)54756694 Subject: United States -- Military policy. Excerpt: . . . the following conditions apply: political considerations threaten to impede effective use of force; a clear and quick military win is not attainable; and public and congressional opinion is indifferent or hostile to the purpose for which force is being used. In effect, the Powell doctrine, like Weinbergers, not only places considerations of feasibility over those of desirability when it comes to using force. It also establishes, as the basic standard of feasibility, prior confidence in the near-certainty of military victory and political sustainability. The doctrine also ignores the likely presence - as in the Gulf War - of significant and politically indispensable allies in future major US wars, allies whose own interests may have to be accommodated in a manner violating doctrinal tenets. The Clinton administration, in response to strong congressional opposition to intervention in Haiti and Bosnia and sharp criticism of its handling of the Somalia intervention it inherited from the Bush administration, has belatedly if only rhetorically endorsed the basic principles of the Weinberger-Powell doctrine. In deciding when and how to employ US forces, the administration declares, a clear distinction must be made between vital interests (those of broad overriding importance to the survival, security, and vitality of our national entity), important interests (those that do not affect our survival but that do affect our national well-being and the character of the world in which we live), and humanitarian interests. In the case of vital interests, use of force will be decisive and, if necessary, unilateral. With...
